TRANSITION RATES

Transition rates are calculated by data collected from Year Out (YOYO) former student interview. The YOYO is conducted on students who exited the previous school year (2011-2012 data are from 2010-2011 exiters). The "N" is the total number of YOYO interviews from district. Indicator 14A is the percentage of respondents enrolled in higher education in the year since exit. 14B is the percentage of respondents enrolled in higher education or competitively employed in the year since exit. 14C is the percentage of respondents enrolled in higher education, competitively employed, enrolled in other education or training, or in some other type of employment in the year since exit. Data at the state level are representative of 2010-11 exiters in terms of ethnicity, gender and disability type, but dropouts are under-represented. When making decisions based on these data, please take into account the number of exiters who completed internships; in many cases this number is quite small. More detailed reports will be sent from the Kentucky Post School Outcomes Center in the near future. Yellow shading indicates that district performance does not meet the state target.
